

Printer
BNB

Whitepaper

Rent Printers -> Get BNB Rewards

**DeFi project on BSC with 8%
daily returns and referral
system**

How To Earn

Mining

After all expenses for mining you will be able to receive on average **8%** of your initial investment every day.

Referral

Convince your friends to rent printers and receive **12%** of their total investments.

Compound

Re-invest your daily rewards to rent more printers that will non-stop print BNB and increase your earnings exponentially.

Fees

5% fee on investing and redeeming BNB.

There is no fee taken when you reinvest your rewards.

We use collected fees for marketing and development of our ecosystem.

Strategy

Everybody has its own strategy, but the most popular and profit-proven strategy from experienced miners is 6/1.

It means to **re-invest 6 times** per week and **take profits 1 time per week**.

Taking profits too often will exhaust your printers and therefore decrease your return on investment in the short and in the long run.

FAQ

How does Coin Printer work?

You deposit your BNB and every day you will earn 8% on your invested amount that accrues rewards throughout the day. Please note, that your ROI will decrease with each subsequent claim.

To keep the highest ROI of 8% per day and higher, we encourage you to compound your rewards for six days and claim on the seventh day (6/1 strategy). This mechanism is built into the contract

How long will the contract pay out rewards?

As long as there is balance in the contract, there will always be rewards.

What is the best strategy?

6/1. 6 compounds + 1 withdrawal per week. Make an action every day. If you start getting greedy and trying to save up your rewards, your ROI will decrease as well

FAQ

What prevents the developers from rugging?

The contract is immutable, meaning that once it is deployed the developers have no access to the contract and cannot send anything out of the wallet.

Can I be too late to deposit my funds?

No, the contract is written to incentivize anyone. However, the impact is just very small. If you can get in early, you should consider doing it and start compounding your stake.

Does it have anti-whale mechanics?

The contract has an in-built anti-whale mechanism. This works as follows; User 1 reinvests 6:1 and gets highest daily percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again.
